

## Utility Buckets

Utility Bucket - "Slip on the forks" accessory buckets or otherwise called Universal Fit buckets could be used together with whichever model or design of extendable reach forklift. If your unit is unable to be matched with a quick-tach unit, another new or used universal fit bucket can be located as an alternative. Standard universal lift truck buckets connect to blades which are up to 6" wide and are 48" long. Bigger fork pockets can be ordered via an account executive upon request.

As universal fit lift truck buckets slip onto the forks directly, they stay on the machinery and are much less vulnerable to damage. These buckets are likewise 50 percent deeper than the quick-tach bucket models. This additional room makes them ideal for carrying irregular shaped loads such as moving large debris piles, broken up concrete, backfilling behind walls, tearing of roof trash and elevating roof gravel.

### Quick-Tach Buckets

Quick-Tach Buckets are constructed for extendable-reach forklifts. They are designed to allow positioning of materials way beyond the reach of a loader. A hardened beveled cutting blade on both sides and on the leading edge reinforces stability, resistance to damage and offers supreme durability. Quick-Tach forklift buckets are reinforced by scuff bars along the base of the unit that shield it from abrasion.

Quick-Tach forklift buckets can be used to substitute the carriage and blades that weigh between 100-700lbs. When installed, these buckets free up more of the unit's cargo capacity, enabling it to handle heavier and larger supplies. The Quick-Tach can dump stuff around 1.5 feet higher thanks to the shorter depth of its bucket. These buckets are built in a customized fashion in order to meet all the specifications of particular makes and models of lifts. It is essential to confer with a construction equipment specialist in order to find the customized Quick-Tach bucket solution for all your needs.

Forklift bucket attachments are outstanding for ground level work on construction job sites. They are often designed for transporting snow in northern parts, and gravel and sand loading. Jobsite clean-up is one more function the lift truck bucket carries out well. The numerous purposes the bucket can complete saves the company more money and time since it does not have to absolutely switch tools or equipment and this could help prevent running into overtime.
